Cyrus India Securities Pvt. Ltd.

SIRIUS CONVENTIONAL SMOKE DETECTOR

Product Overview

Sirius Conventional Smoke Detector is a fire safety device designed to detect smoke in a building or space and alert occupants to potential fire hazards. These detectors are commonly used in residential, commercial, and industrial settings to provide early warning and allow people to take appropriate action, such as evacuating or extinguishing the fire.

Features

- Conventional smoke detector
- Dual LED design provides 360° viewing
- Alarm flag for fast alarm reporting
- Electronics-free base
- Responds well to slow burning, smoldering fires
- Easy installation, Removable innovative sensing chamber, easy for maintenance.
- Reliable fire detection in areas with a wide temperature range from -10°C to +60°C

Specification

- Voltage range : 16 - 32 V DC
- Alarm current : 10 - 100 mA
- Quiescent : 60 uA @ 24 V DC
- Operating Temperature : -10° C to + 50°C
- Humidity : < 95 % RH
- Coverage : 50 sq . meters
- 2 - wire
- Sensor Type : Photoelectric Sensor
- Product size : 10.6 x 10.6 x 5.2 cm

Application

conventional smoke detectors are used in any environment where the primary need is to detect smoke and sound an alarm, providing early warning to occupants and helping them respond to a potential fire. They are suitable for smaller spaces, homes, and commercial buildings that do not require advanced fire detection features.
